GitHub: Primary pradeepdegalaroyal, Secondary degalachenchupradeep

Address: 8-37/1, APTF Colony, Venkatagiri, Andhra Pradesh, India, PIN: 524132

Professional Summary

Ph.D. Researcher in Quantum Machine Learning with expertise in AI, Deep Learning, Quantum Computing, and Machine Learning. Proficient in Python, Qiskit, PyTorch, TensorFlow, QAOA, and variational quantum eigensolvers. Specializes in Quantum-Inspired AI models for computational biology, healthcare, and autonomous systems. Ph.D. Scholar, SRM University AP (Research: Quantum-Inspired Model Generation in Quantum Machine Learning).

Core Skills

Quantum Computing, Machine Learning, Qiskit, Cirq, PennyLane, PyTorch, TensorFlow, Python, QAOA, Variational Quantum Eigensolvers, NetworkX, Supervised/Unsupervised Learning, Reinforcement Learning, NLP, Big Data (Hadoop, Spark), Django, Flask, Pandas, Scikit-learn, Data Visualization.

Education

Ph.D. in Computer Science and Engineering (Pursuing) — SRM University AP, India — Research: Quantum-Inspired Model Generation in Quantum Machine Learning.

M.Tech in Data Science, Gold Medalist — Jawaharlal Nehru Technological University-Gurajada, 2022–2024 — Thesis: Enhancing Long-lived Bug Prediction in FLOSS (BERT, TF-IDF, GCN, RNN). Guide: Dr. B. Tirimula Rao. — - Applied ML for open-source bug prediction.

B.Tech in Mechanical Engineering — Siddharth Institute of Engineering & Technology, 2019–2022 — Project: Three Axis Pneumatic Modern Trailer — - Designed pneumatic system for enhanced functionality.

Diploma in Mechanical Engineering — Government Polytechnic College, 2016–2019 — Industrial Training: Manufacturing Processes.

Professional Experience

Assistant Professor, Computer Science and Engineering — Raghu Engineering College, Visakhapatnam, Aug–Nov 2024 — - Taught AI/ML courses; mentored quantum/data science projects. — - Developed curriculum for 50+ students.

Backend Web Development Intern — PMN Company/Chegg Expert, Jun–Aug 2023 — - Built Django/Flask services for edtech, boosting efficiency 20%. — - Integrated APIs for user auth and data processing.

Projects

Quantum-Inspired RL for Max-Cut Optimization (QML-RL-MaxCut) — Ongoing, 2025 — - Built QAOA-based RL framework in Qiskit/Python; hybrid models cut optimization time 25%. GitHub: [Repo](#)

Quantum Walk Influence Maximization in Social Networks — Ongoing, 2025 — - Qiskit/NetworkX algorithm for node detection; outperformed classical by 25% on real datasets. GitHub: [Repo](#)

Long-lived Bug Prediction in FLOSS — JNTU-Gurajada, Jan–Aug 2024 — - Compared BERT/TF-IDF/GCN/RNN; BERT+MLP achieved top accuracy for bug severity. GitHub: [Repo](#)

Quantum-Inspired Models for ML/AI (PhD Projects) — Ongoing — - Hands-on experience implementing QINNs/QIRL using Qiskit, Cirq, and PennyLane for noise-resilient healthcare apps; quantum simulations outperformed classical baselines by 10%. — - Designed hybrid quantum-classical architectures for biomedical signal processing and cancer prediction.

Certifications

Quantum Algorithms & Cryptography (NPTEL Star, IIT Madras, 2025); Deep Learning (NPTEL, IIT Kharagpur, 2023); Python for Data Science (NPTEL, IIT Madras, 2023).

Conferences

Attended Quantum Conclave — IISc Bangalore, Feb 2025 — - Participated in discussions on quantum technology and cutting-edge research advancements.
